When evening comes, I go back home, and go to my study.... and I put on the clothes an ambassador would wear. Decently dressed, I enter the ancient courts of rulers who have long since died. There, I am warmly welcomed, and I feed on the only food I find nourishing and was born to savor. I am not ashamed to talk to them and ask them to explain their actions and they, out of kindness, answer me. Four hours go by without my feeling any anxiety. I forget every worry. I am no longer afraid of poverty or frightened of death. I live entirely through them.¹

There is much of relevance to the problems of modern international relations in the writings and ideas of the classical (pre-20th century) strategists -- Xenophon, Thucydides, Polybius, Livy, Caesar, Maurikios, Machiavelli, Frederick the Great, Napoleon, Clausewitz, Jomini, Mahan and Corbett. It is not accidental that Machiavelli falls in the middle between those he followed and those who followed him. In the history of strategy, his *Dell'arte della guerra* (Art of War), stands as a watershed between the classical and the modern, a serious study of civil-military relationships and his "*Discorsi sopra la prima deca di Tito Livio*" (*Discourses on Livy*) represents a benchmark in the development of "grand strategy."

Unfortunately, while the works of the great strategists are still treated with respect in history, philology and philosophy courses, as well as at the military academies, the study of their strategic insights and potential application to modern international relations is too often ignored, or worse, treated superficially. None is more victimized by this supercilious hubris than Machiavelli, who seems perpetually defined solely by "The Prince." The objective of this seminar is to rectify

this lacuna and rehabilitate the master strategist for a new generation. It is very appropriate that a seminar focused on the relevance of the strategy classics to modern problems not only be named in Machiavelli's honor, but held in his historic city where the culture and environment that influenced his work is still so well preserved.

Following Machiavelli's concept of a "discussion with the ancients" with relevance to modern issues, this 3 credit seminar encompasses three elements:

- In-depth study of Machiavelli's writings and an appreciation of the Florentine environment in which he wrote them;
- Actively apply Machiavellian teachings in "balance of power" laboratory by participating as a strategist in the European focused historical "Nth Power" simulation and the Asian centered future oriented "Hegemon" simulation.
- Incorporate the insights of Machiavelli to a Research Paper on contemporary foreign policy challenges.

The course is managed by the Office of International Programs at Georgetown University. For details and questions regarding logistics and overseas policies, please contact Karen Wardzala, Assistant Director, Villa Le Balze Programs, Office of International Programs, Georgetown University, via email at: <klw45@georgetown.edu>. See also: <http://villalebalze.georgetown.edu/>.

SEMINAR REQUIREMENTS:

- Quiz on Assigned Machiavelli writings (June 16) = 15%;
- Participation in simulations and class (and workshop) = 20%;
- Research Paper (DUE 1 August) = 65%;

COMMUNICATION:

If in doubt, ASK!

Whether about course requirements, simulation problems or substantive issues – ***the ONLY dumb question is the one that is not asked!***

CLASS ATTENDANCE & IN-CLASS COMPUTING:

This is a seminar where student participation is not only encouraged but required. Class attendance is mandatory and an unexcused absence reduces the grade by 5%.

Portable computers are encouraged – however surfing the web, emailing, texting, or cell phone calls during class are prohibited. Violation is enforced with 5% grade demerit per incident.

EXAMS:

There is one exam in the course – a midterm exam on the required works of Machiavelli. **(June 16)**

RESEARCH PAPER:

Each student will complete one of three possible writing assignments. Option 1 is to conduct research on one of Machiavelli's major works. Option 2 is applying insights from Machiavelli's writings to current and future US foreign policy challenges. Option 3 is to serve as a rapporteur at the conference.

- TOPICS – Students must commit to one of the three paper options before the end of the session in Italy.
- SIZE – minimum of 10 pages of text, typed (font = “Cambria” 12 point; 1.5 line spacing; 8.5” x 11” paper with 1.25” margins all around);
- FORMAT & STYLE
 - MS Word document = doc/docx;
 - History is important but majority of text should be analytical not descriptive;
 - Paginated (starting with first page of text to last);
 - Footnoted at bottom of page using the style shown in Asian Arms Control Project Style Guide.
- SUPPORTING MATERIAL
 - Title page (required with student name and date but not numbered);
 - Supplementary Charts in Excel, Maps and Illustrations in PowerPoint or Word;
 - Source bibliography (required) in same style as footnotes but organized alphabetically by author.
- COLLABORATION –students may work together on a research paper, but the project will be expected to be a minimum of 20 pages and represent double the individual effort.
- FINAL Assignments are due via email to Professors Kroenig <mhk32@georgetown.edu>, Shambaugh <shambaug@georgetown.edu>, and Professors Karber <karberp@thepotomacfoundation.org> on or before **1 August 2014**.

SIMULATION:

A major pedagogical thesis of this course is that the study of strategy involves complex relations between technological development, military force deployment and the political capacity to anticipate long-term self-interest in an evolving security structure and negotiate with others on measures to stabilize it. A simulation allows students to explore the relationship between these variables and their complex interactions in a dynamic and systematic approach. This course will use the “Nth Country -- Asia” (Techno-Diplomacy) simulation “Hegemon” for this purpose and it will involve all students participating in a war game with active diplomacy in a

multi-polar environment. For details on game play and modification for this course, see:

- P.A. Karber and Rowley Rice, "Nth Power: Simulating the Cold War Conventional-Nuclear Balance in Europe," (2012);
- P. A. Karber, Scott LaFoy and Nick Yarosh, "Hegemon: Simulating Competitive Strategy in the Rise of Status Quo Challengers in Asia," (2012).

Participation in the simulation represents 20% of course grade, thus, students are expected to demonstrate active, diligent and enthusiastic participation in the simulation as well as help design the application for Asia – collecting data on technology patterns in the region, projecting rival force development and experimenting with rules – as well as critiquing the results at the end of the semester.
